For too many parents and their children, getting into a highly selective school is seen as the conclusive measure of a young person's worth, a binding verdict on the life that he or she has led up to that point, an uncontestable harbinger of the successes or disappointments to come. Winner or loser: this is when the judgement is made.

By pushing kids relentlessly and narrowly toward one of the most prized schools in the country you are probably setting them up for heartbreak, and you're imparting a questionable set of values.

Your control over the outcome is very, very limited, and outcome says nothing definitive about [student's] talent and potential.
